**Abstract**

---

**PURPOSE:**To impart weather resistance, chemical resistance, durability, water repellency, oil repellency, etc., to the surface of a molded article.

**CONSTITUTION:**A curable plastic is coated with a curable compsn. contg. a resin which is prepd. by reacting a carboxylated fluorocopolymer with a glycidylated vinyl monomer, has side chains terminated with unsatd. groups, and is sol. in a solvent or reactive diluent. The plastic is then cured.
